WORK EXPERIENCE

Oct 2021- Oct 2023

Backend Engineer - Rye&Catchers

Seoul, South Korea

- Implemented a user-friendly frontend and backend control panel web application in Python (Django) and TypeScript (Vue.js) for the Korean streaming platform Genie TV owned by KT - the second largest telecommunications company in South Korea
- Worked in agile team to develop a centralized data store using Java (Spring Boot), MySQL, Git, Docker, Kubernetes, and Naver Cloud Platform (A Korean AWS), providing data scientists with fast access to data for personalized advertising for Line-Japan's largest communication platform
- Leveraged GA360 to gather, analyze, and visualize client data, generating actionable insights that supported their business goals

Jul 2017- Nov 2020

Fullstack Developer - Jesta I.S

Montreal, Canada

- Developed and maintained web applications using Java and JavaScript
- Contributed to building a secure and reusable codebase through code reviews and best practices
- Participated in daily meetings to discuss project progress and requirements
- Identified and resolved bugs efficiently to maintain application stability
- Documented technical specifications and user requirements for future references
